

Hello and Welcome to Geomegic!

What is Geomegic?

Geomegic is a Design It Yourself (DIY) coloring pages method. With Geomegic you become your own coloring pages artist!

I created this method because like many other people I have no natural ability to draw or work with color but I always wanted to find some form of artistic expression. That's how Geomegic idea came to be and I am really happy to share it with you.

Word 'Geomegic' means Geometry Magic. Geometric grid that's where the magic happens. Using the grid makes it easy to create all kinds of cool patterns and make them as simple or as complex as you want them to be.

So print out the next page and let the magic begin!

How to design a coloring pattern

Step 1

Print out the second page of this document – your blank canvas page. You will use this page to design your pattern or one of our patterns. If you are new to Geomegic you may want to try our patterns first. Follow this link to find our patterns: <http://geomegic.com/patterns/>

Step 2

Once you have a printed canvas page grab a black pen or a led pencil and an eraser and start designing your pattern. Watch step by step instructional videos to get some ideas. Follow this link to find instructional videos: <http://geomegic.com/category/patterns/>

Step 3

Now color your pattern any way you choose. Don't know how to chose colors?! No problem! You can find sample coloring ideas below the instructional videos for each pattern. Follow this link to find our patterns: <http://geomegic.com/patterns/>
